where  $\bar{T}_{l,i} \equiv T_l \bar{s}^{m_i/2}$  if the domain includes the coordinate singularity, and  $\bar{T}_{l,i} \equiv T_l$  if not; and  $\bar{g}_{\mu\nu} \equiv g_{\mu\nu}/\sqrt{g}$ .

2. The double-angle formulae are used to reduce the above expressions to the Fourier harmonics of  $\bar{g}_{\mu\nu}$ : see **kija** and **kijs**, which are defined in [preset](#).
